“To give hope, when life is challenged by cancer and to care for all who need it in Douglas County.”

*Bruce Hanna, Past President,
the Community Cancer Center*

A diagnosis of cancer can spark many emotions, including fear, sadness and confusion.

During these uncertain times, it is easy to become overwhelmed. That is why a host of resources have been developed to inform, guide and support those facing cancer.

There Is Help!

To aid our patients with these needs, the Community Cancer Center has created a cancer resource program to ease the burden of cancer and patient treatments for our patients and their loved ones. Our patient navigator can connect you with community services and programs as well as provide you with published information.

What is a Patient Navigator?

The patient navigator works with our patients from cancer diagnosis through all phases of their cancer experience. Each patient’s experience will be different depending on their individual needs.

Our patient navigator meets with patients and family members, either by phone or in person, to address their needs.

A Patient Navigator can help you when

- You need a nurse to solve problems, conquer the medical maze and help develop your personal path to cancer recovery.
- You have met healthcare providers who offer differing opinions and are confused where to go next.
- You, or a loved one, have been recently diagnosed with cancer and you need reliable information quickly.
- You feel overwhelmed by information overload with paperwork and the insurance burdens of managing your illness.
- You want a navigator dedicated to coordinating your medical care, getting you the help you need and working with your family.

What A Patient Navigator Can Help You With:

Medical Issues

Transportation & Gas Assistance
Establishing Primary Care
Palliative Care & or Hospice Care
Pain & Symptom Relief
Continuation of Care
Cancer Education Specific to Your Diagnosis
